

Rentool

RENAULT CAN/K-LINE ECU TOOL è uno strumento OBDII con varie funzioni di modifica della memoria interna dell'unità di controllo elettronico Renault.

Dettaglio delle funzioni:

Read(lettura) / Write(scrittura) EEPROM o FLASH
Cancella codice immobilizzatore
Leggi stato immobilizzatore e Schede programma.

Tutte le funzioni funzionano tramite connettore OBD II,
ma qualsiasi unità di controllo supportata può essere collegata "sul banco"
tramite collegamento manuale.

La funzione di cancellazione del codice immobilizzatore è completamente
automatica:

basta premere il pulsante e l'unità di controllo verrà cancellata.

La centralina è pronta ad accettare il nuovo codice immobilizzatore
dopo che il codice precedentemente programmato è stato cancellato -
non è necessaria alcuna successiva programmazione.

La versione del Software 2.88 di RENAULT CAN/K-LINE ECU TOOL ti offre i seguenti
